EDUCATION

Degree/Examination	Year	Institution
B.Tech in CSE	2023 - 2027	Netaji Subhas University of Technology, Delhi
Class XII (CBSE)	2022	Rishikul Vidyapeeth Alipur, Delhi
Class X (CBSE)	2020	Rishikul Vidyapeeth Alipur, Delhi

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, SQL
AI/ML: LLMs, Gemini API, OpenAI Whisper, PyTorch, Agentic AI, Prompt Engineering, RAG, NLP, STT/TTS, LSTM
Full Stack: Node.js, Express.js, FastAPI, Flask, React.js, Next.js, REST APIs, GraphQL, WebSockets, TanStack Query, Socket.IO
Databases & DevOps: PostgreSQL, MongoDB, Redis, Docker, AWS, Azure, CI/CD
Tools & Platforms: Git, SendGrid, Firebase, Google Cloud, LiveKit, Deepgram, ElevenLabs
Core CS: DSA, System Design, Operating Systems, DBMS, OOP, Computer Networks

EXPERIENCE

- SDE Intern at Hireved** Feb 2026 – Currently
- Architected end-to-end system design for a **multi-portal** recruiter marketplace serving Employers, Recruiters, and Admins.
 - Engineered AI-powered backend modules for candidate screening and job-posting copilot, reducing recruiter effort by **60%** via **LLMs**.
 - Developed **70+ REST APIs** covering **RBAC**, and real-time interactions using **Node.js, Express, PostgreSQL**, and **JWT** authorization.
 - Led **integration testing** across **3 interconnected portals**, improving deployment stability and reducing **critical API failures** in staging.
- SDE Intern at GydeXP** Aug 2025 – Feb 2026
- Enabled automated **voice-based** hotel reservations by architecting a real-time conversational **AI booking agent** with strict guardrails.
 - Reduced **API infrastructure costs** and enhanced system reliability by implementing **LLM prompt caching, result validation**.
 - Achieved **95% tool-call accuracy** across **500+ conversations** and prevented duplicate reservations via idempotency flags.
 - Delivered secure system access and real-time data sync across hotel, guest, and staff platforms via a **scalable backend**.

PROJECTS

- Virtual Avatar with Indian Sign Language Support** Python, PyTorch, Flask, Whisper, LSTM, Docker
- Established a real-time accessible classroom for deaf education by developing an end-to-end speech-to-sign pipeline driving a 3D avatar using **OpenAI Whisper ASR** and **800+ SiGML gestures**.
 - Ensured uninterrupted translation by architecting a fault-tolerant text-to-gloss engine combining a **custom Seq2Seq Bidirectional LSTM** with a deterministic Stanford Parser fallback.
 - Accelerated model improvement by engineering a ML data ingestion pipeline with an automated feedback loop and **Kaggle-integrated retraining** workflows.
- Cash Management & Reconciliation Software** Next.js, PostgreSQL, TanStack Query, Rechart, Google APIs
- Engineered a full-stack cash management SaaS adopted across a **chain of 10 retail stores**, delivering automated financial workflows, role-based access, and real-time data synchronization across all locations.
 - Reduced recap update latency by **over 98%** (from **800ms+ to ~16ms**) by implementing synchronous state updates, optimistic UI rendering, and optimizing batched database saves for high-frequency transactions.
 - Slashed month-end financial close time from **3 days to 10 minutes** by automating **2-way reconciliation** (DSR to bank) through **Gmail/PDF ingestion**, structured parsing, and merchant-ID matching algorithms.
- LegalSetu** React.js, Tailwind CSS, AWS, Firebase, Gemini
- Expanded legal accessibility across **13 regional languages** by engineering an AI-powered multilingual legal assistant delivering real-time voice and text-based counsel to underserved users via **Gemini AI** and **Google Cloud STT/TTS**.
 - Automated government form-filling with **97% accuracy** and legal document analysis by building an intelligent multi-stage processing pipeline with **AWS S3**, enabling users to intuitively query uploaded contracts clause-by-clause with contextual AI responses.
 - Streamlined verified lawyer discovery by connecting users with licensed advocates within a **5km radius**, architecting a low-latency real-time messaging backend using **Socket.IO**, **Node.js**, and **Google Maps API**.

ACHIEVEMENTS

- Winner:** Adobe Express Add-ons Hackathon, NSUT (600+ participants) 2026
Built **DevSnap**, an Adobe Express add-on for automated developer portfolio and snapshot generation.
- Winner:** Hack-A-Tone, IIT Delhi × GydeXP (3000+ participants) 2025
Built **LegalSetu**, an AI multilingual legal assistant with real-time voice counsel via Gemini, Google Cloud STT/TTS.
- Winner:** IIT Delhi Alumni Day Hackathon 2025 (500+ participants) 2025
Presented **GydeXP**, an AI voice agent, WhatsApp agent, and PMS system for hotel automation.
- 2nd Runner-Up:** Industrial Ideathon 2025, GNCTD × NSUT (2500+ participants) 2025
Built **Raahi**, an industrial innovation platform presented before Delhi CM and senior IAS officers.
- 2nd Runner-Up:** CodeClash 2.0, National Hackathon at Google Office Gurugram (4000+ participants) 2025
- Developed two SaaS platforms in production - **Savra Edu** 🌀 (1000+ users) and **Sports Planet** 🌀 (10 outlets).
